Panutda Wongsa

Frontend Developer (React / Angular)

080-069-1626 | panutdawongsa@gmail.com

SUMMARY

Frontend developer with 2+ years at Kitmeechai Electric (KMCE), building responsive React interfaces and contributing to Angular real-time dashboards (MQTT). I turn Figma designs into reusable components and work in a Git-based workflow with engineers and designers.

WORK EXPERIENCE

Technology Development Assistant (Frontend) — Kitmeechai Electric Co., Ltd. (KMCE) · 2024 – Present

- Built the KIT-WISe company website in React: responsive, component-based, with a filterable project gallery and contact flow, deployed on Vercel.
- Designed the pages and features of a real-time Angular dashboard (MQTT) showing which device, where, what error occurred and how to fix it, and contributed code alongside the lead developer.
- Turned Figma designs into responsive, reusable UI components; also designed new mobile-app features in Figma (device sharing via QR code) for developers to build.
- Built Node-RED flows that send device fault and offline alerts to Discord and LINE; worked with engineers to clarify requirements and ship.

Frontend / UI Intern — KMCE · 2023 – 2024

- Built UI components and supported frontend development and visual assets.

SELECTED PROJECTS

KIT-WISe Company Website — React, Vercel. Live: kit-wi-se-energy.vercel.app

Smart IoT Dashboard — Angular, MQTT. Designed the pages and features and contributed code; used by engineers and back-office admins to monitor 100+ devices across 10+ stations, so issues are seen directly instead of waiting for customer reports.

SKILLS

Frontend: React, Angular, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Vite, MQTT, Node-RED
Workflow: Git, GitHub, Figma to code, reusable component design

EDUCATION

B.Sc. Computer Science — Rajamangala University of Technology Krungthep (RMUTK) · Graduated 2024

Certification: UX/UI Specialization (Introduction, Empathize, Wireframes) — mydemy & NocNoc
